

***** PRESS RELEASE FOR IMMEDIATE DISTRIBUTION *****

Grandeye Opens US Office

September 2007 - Guildford, England. Grandeye Ltd, the award-winning leader in the design and manufacture of 360 degree analog and IP cameras announced it has opened a US office in Columbia, Maryland.

The US office will be managed by Robert Gregson who has transferred from Grandeye headquarters in the UK.

The success of the Grandeye Halocam, a 360 degree analog camera has necessitated a US base which will be staffed by both sales and support personnel.

Grandeye have recently been extremely successful with the new Halocam Compact, an IP-based camera building on the success for Halocam analog, which will be demonstrated at ASIS in Las Vegas at Grandeye's stand # 5109.

About Grandeye

Grandeye Ltd, based in Surrey University Technology Centre, Guildford, UK, is the market and technology leader in 360° cameras for situational awareness. Its award-winning Halocam technology based on a dedicated IMTERA processor currently powers a number of 360° cameras supplied by a number of OEM manufacturers and system integrators with distribution channels covering all five continents.
